

## Legal Aid Lawyers in Cambridge

Legal Aid Lawyers in Cambridge - Energy law for the emerging world of energy markets is our company's specialty. There are many challenges in addition to new opportunities for our firm to help assist our many clients in taking advantage of this new world. Our energy law group offers a comprehensive array of legal services to international and domestic energy clients. We serve everybody from start-up companies to major corporations. Whether your company provides solar energy technology or more traditional forms of energy generation, both have difficult transactional needs. We provide practical and sound recommendation and representation drawing on a depth of knowledge of the political, legal and economic issues involved in energy matters.

1. We assist with new developments associated to renewable/alternative energy technologies (e.g., fuel cells, solar, wind, biomass, geothermal, hydropower and biofuels). In the case of the solar energy business, we act for users, developers and manufacturers in preparation of tax matters, development agreement, land and roof release, financing agreements with investors, legislative and regulatory problems, and commercial arrangements;
2. We have knowledge in projects dealing with energy efficiency demand management and cogeneration consisting of institutional, commercial, and industrial contexts, consisting of engineering, construction and financing matters;
3. In respect of new statutory requirements to complete energy plans and their integration of land use, we provide advice to public and private entities;
4. For energy projects we help to structure and negotiate project financing, joint venture arrangements, transfer and licensing arrangements, and acquisition;
5. Within the early stages of commercialization and financing of clean technologies, we could provide numerous services to assist;
6. We help with compliance and approval with new energy and environmental law requirements (consisting of carbon management and disclosure);
7. We help to protect, commercialize and create intellectual property rights;
8. We could help in initial public offering opportunities, venture capital opportunities, private equity;
9. For concerns like for instance "leave to construct" applications for both electricity and gas infrastructure, we could represent clients at hearings before regulatory commissions and agencies, creation of independent transmission businesses, licensing, setting of rates, approvals, compliance problems and permitting
10. We counsel senior management and boards of directors about problems of corporate disclosure and governance, environmental stewardship and liability issues, climate change, evolving regulatory issues, and, where appropriate, helping in representations to governments.
