

Cambridge Criminal Lawyer

Cambridge Criminal Lawyer - Our Group generally specializes on pursuing legal solutions regarding insurance and commercial theft and fraud. As the worldwide commercial crime rate skyrockets, the government seems to be allocating fewer resources to combat it. As such, disputes which used to be dealt with by the government have presently been passed down to the civil courts.

Our lawyers are knowledgeable in both civil and criminal litigation. They make use of this skill, along with our company's personal contacts, to make certain that our client's case is meticulously investigated and pursued. The initial investigation is important to the end resolution of a fraud lawsuit. Due to this, our lawyers work regularly together with the police department, as well as other investigative agencies and forensic accountants, statistical and computer professionals, handwriting analysts, and private investigators to make sure that a thorough investigation is completed.

We even provide private seminars regarding cutting-edge issues that our clients may be interested in. During these seminars, we give our opinions and discuss legal issues which relate to the topic.
