

Cambridge Patent Lawyers

Cambridge Patent Lawyers - Our firm leads the way in intellectual property law. We have an Intellectual Property (IP) Group with various technological skill specializing in the exploitation, development, protection and use of information technology and intellectual property.

Our team is knowledgeable and experienced at trade-mark applications, registrations and patent applications. Our members have assisted with many industrial design registrations and applications.

A wide range of scientific and legal backgrounds are essential to offer useful legal recommendation regarding complex and specialized IP-related concerns. Our experts have studied the sciences at advanced levels. Some have engineering degrees while others have graduate degrees in the fields of physics, biotechnology, chemistry, electronics, engineering physics, and electrical engineering. Among our group are members with doctoral degrees in applied chemistry, analytical chemistry, nutrition & metabolism, plant biogenetics, genetics, oncology and telecommunications. Advanced scientific backgrounds along with considerable skill at the bench equip our scientific experts with extraordinary expertise and skills.

The Industry

Intangible property could be the most valuable property in many research organizations and businesses. The control of this crucial intellectual property requires the obtaining of effective and cost-efficient protection. Cultural industries, technology and telecommunications are important to the nation's economic growth and health. To ensure continued economic success, companies must have a well-developed intellectual property plan.

As the trend to protect research results before public dissemination grows, access to the rights of others through licensing-in or cross-licensing is a primary concern. Therefore, flexibility in an intellectual property position could serve the dual purpose of providing an asset and securing a niche in order to create opportunities for extra revenue flow through licensing. A start-up or research-oriented organization could attain substantial advantages by combining intellectual property assets through cross-licensing with those of a large worldwide business.

Protecting Intangible Assets

In today's competitive climate, several companies have intangible assets like for instance their trade secrets, goodwill and brands, which are part of their commercial success. Hence, protecting intangible assets, which may include a significant part of their value, is an essential approach to business.

Inter-disciplinary Approach

We can offer a full range of services because of our inter-disciplinary approach. We are well positioned to offer knowledgeable and up-to-date suggestion both to businesses in the field of technology and to those affected only incidentally by new technological developments.
