

Immigration Attorney Cambridge

Immigration Attorney Cambridge - These days there is increasing concern about privacy problems and the complexity of new privacy legislation. Organizations and individuals which supply or develop biotechnology or information technology have different legal requirements. So do individuals who depend on technology to secure a competitive advantage for their business, or just to function in day-to-day operations. Our Technology, Privacy and Intellectual Property lawyers assist clients in maximizing the use of intellectual property in their business operations. Our goal is to be able to create value for our clients.

We provide various legal services handling issues related to privacy technology, biotechnology and intellectual property from an international to a local basis. Our assistance comprise trade-marks, copyright, privacy, e-commerce, commercialization, domain names, intellectual property, information technology and operational issues.

Intellectual Property Services:

- Copyright
- Industrial Designs
- Licensing
- Trade Secrets
- Trade-marks

On a regional, national and international scale, we can assist in enforcing, obtaining and maintaining intellectual property rights. We help clients in the entertainment, automotive, telecommunications and manufacturing sectors.

Technology Services:

- e-commerce initiatives
- development, protection, distribution, licensing and sale of technology
- acquisition of technology

To both suppliers and users of technology, we advise a lot of venture capitalists and financial institutions in structuring loan transactions. We can even help businesses with their confidentiality agreements, computer system and Internet usage policies, consulting agreements, outsourcing arrangements, employment agreements, source code escrow, strategic alliances and joint ventures.

Privacy Services:

To guarantee compliance with privacy legislation, we help many employees, organizations, contractors and suppliers. We can help many businesses with their personal information management systems: crafting policy and privacy procedures, advising with respect to disclosure, use and collection of personal information. We assess Privacy Impact for clients' organizations or businesses.
